PROJECT EXPERIENCE

E-Commerce Platform

Full-Stack Developer | Feb 2025 – Present

- Built a scalable e-commerce application with **React.js**, **Node.js**, and **Express.js**
- Integrated RESTful APIs for product, order, and user management, supporting a **25% increase in sales** over six months.
- Developed core features: **dynamic shopping cart**, **server-side pagination**, **advanced filtering**, and **role-based authentication**.
- Optimized rendering performance, reducing load time by **3 seconds**.
- Designed for scalability: handled **500+ concurrent users** with **zero reported security incidents**.

Resume Generator

Frontend Engineer | Nov 2024 – Feb 2025

- Developed a resume builder using **React.js**, integrated with the **OpenAI API** for smart content suggestions.
- Streamlined the resume creation process, cutting average completion time from **40 minutes to under 10**.

- Ensured high-fidelity output by implementing a custom rendering engine and robust form validation, reducing formatting errors by **90%**.
- Built a real-time preview system with localStorage for persistent data handling and seamless user experience.
